- 2.25 or 3 inch diameter hardened steel teeth or carbide inserts
- Veneer gauges
- 2 inches of equalization per tooth on the top and bottom jaws
- Roller inbound and outbound tables
- One section of 3 ft. x 10 ft. gravity roller conveyor
- 240/480 volt 3-phase electric powered hydraulic power unit with:
 - NEMA 3 rated control enclosure with start, stop and disconnect
 - 100 gal. hydraulic reservoir filled with AW46 hydraulic oil
 - Sight/Temperature gauge
 - Filter assembly
 - 2-stage hydraulic pump

Also available with EPA compliant Diesel Power Unit

The Chris Cutter frame is designed to be the most rigid stone splitter frame in the industry and carries the only lifetime guarantee. This rigidity allows all of the cutting force to be immediately transferred to the stone and not absorbed by the frame giving you superior splits and more power to cut the harder stones.
